

Code-Layout, Readability and Reusability

Date	15 March 2026
Team ID	SWTID-2026-6095
Project Name	EduGenie
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	
2	Proper File Structure	Files and folders are logically organized	Yes	
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	
4	Function / Method Names	Functions are descriptively named	Yes	
5	Code Comments	Inline and block comments explain log	Yes	
6	Modular Design	Code is split into reusable functions/modules	Yes	
7	No Redundant Code	Duplicate or unused code is removed	Yes	
8	Error Handling	Exceptions and errors are handled gracefully	Yes	

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Google Gemini API Connection Wrapper	Python / Gemini SDK	Utilized across all content generation pipelines	High

2	Lamini LLM Core Processing Engine	Python / Lamini SDK	Called across specialized fine-tuning and task tasks	High
3	Custom Error Handling & Retry Mechanism	Python	Embedded into every API call wrapper	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Clean, minimal setup centered effectively around LLM execution streams.
Readability	5	Highly legible code structure prioritizing understandable AI pipelines.
Reusability	4	Well-abstracted integration helpers for Gemini and Lamini APIs, preventing logic duplication.
Documentation / Comments	5	Transparent annotations outlining how parameters pass between models.
Overall Score	4.8	Solid, concise architecture perfectly calibrated around generative AI pipelines.
