

Technology Stack

Date	26 June 2026
Team ID	SWTID-2026-6095
Project Name	EduGenie – AI Powered Educational Assistant
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML, CSS, JavaScript	Simple and responsive user interface for students to ask questions, generate quizzes, and view learning roadmaps.

2	Backend / Server-Side	Python, FastAPI	Handles user requests, communicates with AI services, and provides fast API responses.
3	Database / Data Storage	SQLite	Lightweight database used to store user activity, generated content, and learning records during development.
4	Cloud / Hosting / Deployment	Localhost / Uvicorn Server	Easy testing and deployment during project development without additional hosting cost.
5	Version Control & CI/CD	GitHub	Used for team collaboration, source code management, and project version tracking.

6	Third-Party APIs / Other Tools	Gemini AI API	Generates answers, explanations, quizzes, summaries, and personalized learning recommendations for users.
