

Project Executable Files

Date	26 June 2026
Team ID	SWTID-2026-6095
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	yes
2	README / Setup Guide (instructions to run the project)	yes
3	requirements.txt / package.json / dependency file	yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	yes
6	Deployed application URL (if hosted)	yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	NA

10	Demo video or walkthrough (if required)	NA
----	---	----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

EduGenie/

```

|
|— .gitignore
|— explanation_module.py
|— learning_path.py
|— main.py
|— qna.py
|— quiz_module.py
|— summary_module.py
|— README.md
|— requirements.txt
|
|— static/
|   |— index.html
|   |— style.css
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	NA
Login Credentials (Demo)	NA
Platform / Hosting Provider	NA
Repository Link	https://github.com/BhavyaAICE/EduGenie
Demo Video Link	NA

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Install Python 3.10 or later on your system.
2. Clone or download the EduGenie project from the GitHub repository.
3. Open the project folder in Visual Studio Code or any Python IDE.
4. Create and activate a virtual environment (recommended).
5. Install all required dependencies using the following command:

```
pip install -r requirements.txt
```

6. Configure the Google Gemini API key in the environment configuration file.
7. Start the FastAPI application using the following command:

```
uvicorn main:app --reload
```

8. Open your web browser and visit:

```
http://127.0.0.1:8000
```

9. Use the EduGenie interface to access the available AI-powered features such as Question Answering, Concept Explanation, Quiz Generation, Text Summarization, and Personalized Learning Path Generation.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	No known issues.	Working as expected.
2	NA	NA
3	NA	NA
