

## Project Demo Planning

|               |                 |
|---------------|-----------------|
| Date          | June 26, 2026   |
| Team ID       | SWTID-2026-6095 |
| Project Name  | EduGenie        |
| Maximum Marks | 1 Mark          |

### Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

| S.No | Demo Section                             | Description                                                                                                                         | Duration (mins) | Responsible Member            |
|------|------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|-----------------|-------------------------------|
| 1    | Introduction & Problem Statement         | Introduce EduGenie and the problem of fragmented, hard-to-access learning tools for students and self-learners.                     | 2               | Parvesh Kumar Sharma          |
| 2    | Solution Overview                        | Walk through the FastAPI + Gemini AI architecture and the five core modules (Q&A, Explanation, Quiz, Summarization, Learning Path). | 2               | Parvesh Kumar Sharma          |
| 3    | Live Demo: Q&A & Concept Explanation     | Demonstrate the /qa and /explain endpoints, e.g. answering "Which is the largest ocean?" with added context.                        | 3               | Dev                           |
| 4    | Live Demo: Quiz Generation               | Demonstrate the /quiz endpoint by generating a self-evaluation quiz on the Pythagoras Theorem (Scenario 2).                         | 3               | Khushi Khandelwal             |
| 5    | Live Demo: Summarization & Learning Path | Demonstrate the /summarize endpoint and the /learn/recommendations endpoint with an SQL learning roadmap (Scenario 3).              | 3               | Bhavya Gupta & Ravindra Meena |
| 6    | Q&A Session with Audience                | Open the floor for audience questions and clarify any doubts about EduGenie's features or architecture.                             | 2               | All Team Members              |

### Demo Flow Summary:

| Step | Activity                         | Notes                                                                                                                         |
|------|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| 1    | Introduction & Problem Statement | Present EduGenie's purpose and the problem of fragmented, inaccessible learning tools (~2 mins)                               |
| 2    | Solution Overview                | Explain the FastAPI + Gemini AI architecture and the five core modules (~2 mins)                                              |
| 3    | Live Feature Demonstration       | Demonstrate Q&A, Concept Explanation, Quiz Generation, Summarization, and Learning Path modules using Scenarios 1–3 (~9 mins) |
| 4    | Q&A Session                      | Open floor for audience questions and clarifications (~2 mins)                                                                |
